Learn the Skills of Repairing Electronics Products

Even though we now live in a disposable society it is still very often more cost effective for companies to repair electronic equipment rather than disposing. Through responsible use, reuse and recycling of electronics, the consumer electronics industry and consumers can protect and preserve the environment - together!

Dynamics Circuit (S) Pte. Ltd. Group specializes in the repair and servicing of electrical and electronic systems. Repairs are made to component level and include through-hole and surface-mount technologies.

Repairs made by the company range from simple analogue boards through to the most sophisticated microprocessor printed circuit boards (PCBs). Our engineers possess the expertise needed to ensure accurate fault diagnosis in complex microprocessor systems and the skill to repair the latest surface mount assemblies.

While we have been very successful in this business, it’s time for us to share our expertise with people like you! In our hands-on training labs along with theoretical lessons, you’ll acquire the confidence and knowledge needed to repair and service electronics equipment used in business and industry. You’ll have proven hands-on troubleshooting experience with printed circuit boards, soldering techniques, testing components, electronic projects and many more!

We only take max of 10 students/class, call early to secure your seats!!

Learning the skills to Repair Electronics Units:
- Repair-It-Yourself
- Hobbyist & Tinkerer
- Professional Electronics Technician

We will guide you to the end!!!

Call Now:
Kuna : 9729 3487
Satish : 9857 9400

Any Repair Information and Books you have read would NOT turn you into a professional electronics repairer!
You need hands on guidance and practical lessons to see and feel for your self, we are here to kick-start you and share our experiences!
Our Experienced training instructors is there to show and share with you the methods and tips to get you started.
From our many years of experienced, we put together this training on all you should know about electronics repairing!
