

Jackson Bakery

The Business Advisor from SME Centre@SCCCI advised us on the government schemes which are relevant for our business. Upon his advice, we successfully applied for funding to automate part of our bread making process. This enabled us to reduce our manpower requirements by 30 per cent and strengthen our business in today's tight labour market.

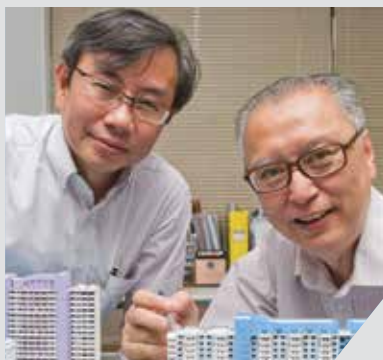

Mr Tang Siew Chuan
General Manager

Soon Huat Bak Kut Teh

The Business Advisor at SME Centre@ASME was extremely patient, helpful and responsive to our enquiries. With his guidance on government assistance for SMEs and advice, we not only identified areas to improve our productivity and develop our business, but were also able to utilise different grants and schemes to help us do so.

Mr Jabez Tan
Owner

Architect's Group

Working with SPRING to bring about productivity changes to our business was very easy. The ICV allows smaller companies like ours to carry out process improvement projects through redemption of the voucher. We became more efficient and productive once we had a server up, and were able to implement better file and knowledge management processes.

Mr Eddie Yeo (Right)
Partner

Dynamics Circuit

Contrary to what many companies believe, it was very simple to apply for the ICV. The Business Advisor from the SME Centre@SICCI guided us through our ICV application to offset the consultancy costs for ISO 9001 certification. This enabled us to standardise our business processes and achieve consistent service quality. We are now better positioned for future growth.

Mr Kunasegar Raman
Managing Director
